

## Recent Advances in the Modeling of Hydrologic Systems

Filesize: 5.44 MB

### ***Reviews***

*This is actually the best ebook we have read till now. Indeed, it can be enjoy, nevertheless an interesting and amazing literature. You will not feel monotony at whenever you want of the time (that's what catalogs are for regarding should you question me).*

## RECENT ADVANCES IN THE MODELING OF HYDROLOGIC SYSTEMS

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the NATO Advanced Study Institute, Sintra, Portugal, July 10-23, 1988 | Modeling of the rainfall-runoff process is of both scientific and practical significance. Many of the currently used mathematical models of hydrologic systems were developed a generation ago. Much of the effort since then has focused on refining these models rather than on developing new models based on improved scientific understanding. In the past few years, however, a renewed effort has been made to improve both our fundamental understanding of hydrologic processes and to exploit technological advances in computing and remote sensing. It is against this background that the NATO Advanced Study Institute on Recent Advances in the Modeling of Hydrologic Systems was organized. The idea for holding a NATO ASI on this topic grew out of an informal discussion between one of the co-directors and Professor Francisco Nunes-Correia at a previous NATO ASI held at Tucson, Arizona in 1985. The Special Program Panel on Global Transport Mechanisms in the Geo-Sciences of the NATO Scientific Affairs Division agreed to sponsor the ASI and an organizing committee was formed. The committee comprised the co-directors, Professor David S. Bowles (U.S.A.) and Professor P. Enda O'Connell (U.K.), and Professor Francisco Nunes-Correia (Portugal), Dr. Donn G. DeCoursey (U.S.A.), and Professor Ezio Todini (Italy). | I - Introduction.- 1. A Historical Perspective.- 2. Hydrology: Infusing Science into a Demand-Driven Art.- II - State-of-the-Art in Modeling Individual Components of the Hydrologic Cycle.- 3. Hydrologic Advances in Space-Time Precipitation Modeling and Forecasting.- 4. The Formulation of Evaporation from Land Surfaces.- 5. Physics-Based Models of Snow.- 6. A Physically Based Snowcover Model.- 7. Infiltration, Soil Moisture, and Unsaturated Flow.- 8. Overland Flow: A Two-Dimensional Modeling Approach.- III - State-of-the-Art in Modeling Linked Components of the Hydrologic Cycle.-...
